

## **CROW Newsletter-Mini December 2022**

We haven't produced a full newsletter this time, but the following article is a reassuring summary of many recent Australian developments, including new state renewable targets, commitments to large renewable power, and more

<https://reneweconomy.com.au/australias-stunning-spring-into-the-green-energy-future/>

In addition, there has been

- a commitment by Energy Ministers to a new mechanism to fast track large batteries and other energy storage - <https://reneweconomy.com.au/energy-ministers-agree-to-fast-track-big-batteries-and-long-duration-storage/>
- funding from the Australian Renewable Energy Agency to achieve a ten-fold increase in grid-forming electricity storage capacity in the National Electricity Market - <https://reneweconomy.com.au/australia-backs-2-7bn-of-big-batteries-to-narrow-gap-to-100-pct-renewables/> and
- more commitment by NSW to transitioning to zero emission buses, with 100 already in service, and Greater Sydney's 8000 plus bus fleet to transition by 2035 - <https://www.transport.nsw.gov.au/news-and-events/media-releases/zero-emission-buses-powering-up-3-billion-funding-for-new-fleet>
